

Supplementary Information for:

Coeval primary and diagenetic carbonates in lacustrine sediments challenge palaeoclimate interpretations

Authors: Jeremy McCormack & Ola Kwiecien

This PDF file includes:

Legend for Supplementary Table 1

Supplementary Table 1: Oxygen and carbon isotope composition of aragonite encrustations. Additional information includes depth in the Ahlat Ridge core, core section, depth in core section, age after Stockhecke et al.⁴⁹ and whether encrusted ostracod valves or encrusted hollow casts were measured (sheet 1 in the accompanying .xlsx file).
